Support Ocean-Friendly Seafood

Best Choices are abundant, well-managed and caught or farmed in environmentally friendly ways.

Good Alternatives are an option, but there are concerns with how they're caught or farmed – or with the health of their habitat due to other human impacts.

Avoid for now as these items are caught or farmed in ways that harm other marine life or the environment.

You Can Make A Difference

Support ocean-friendly seafood in three easy steps:

1. Purchase seafood from the green list or, if unavailable, the green list or, if unavailable, Marine Stewardship Council blue eco-label in stores and restaurants.
2. When you buy seafood, ask where your seafood comes from and whether it was farmed or wild-caught.
3. Tell your friends about Seafood Watch. The more people that ask for ocean-friendly seafood, the better!

Why Do Your Seafood Choices Matter?

Worldwide, the demand for seafood is increasing. Yet many populations of the large fish we enjoy eating are over-fished and, in the U.S., we import 80% of our seafood to meet the demand. Destructive fishing and fish farming practices only add to the problem.

By purchasing fish caught or farmed using environmentally friendly practices, you're supporting healthy, abundant oceans.
